(914) 221-8507 | Lawrenceville, GA | tyfannam@gmail.com | linkedin.com/in/t-moulton | tmoulton-cyber.github.io

PROFESSIONAL SUMMARY

Recent Cybersecurity graduate with a strong academic foundation in network security, data analysis, SQL, and Python. Hands-on experience leading teams, tracking operational metrics, and documenting business processes in a fast-paced environment. Proven ability to communicate clearly across functions, enforce compliance standards, and deliver consistent results. Pursuing a Master of Science in Cybersecurity at Georgia Tech while actively seeking entry-level roles in cybersecurity, data analysis, or IT operations.

EDUCATION

Georgia Institute of Technology

Master of Science: Cybersecurity (In Progress) | Jan 2026 – May 2028

Kennesaw State University

Bachelor of Science: Cybersecurity | GPA: 3.62 | Cum Laude | Dec 2025

PepsiCo S.M.I.L.E Scholarship, Viceroy Decree Scholarship, Hope Scholarship

Westchester Community College

Associate in Applied Science: Cybersecurity | GPA: 3.6 | Graduated with Distinction | May 2023

Phi Theta Kappa, PepsiCo Scholar, Women in STEAM, Commit to Change Leadership Program

EXPERIENCE

Small Sort Supervisor | United Parcel Service (UPS)

Atlanta/Doraville, GA 02/2026 – Present

- Leads a team of package handlers in a fast-paced sort operation, identifying process gaps and implementing solutions to maintain productivity, accuracy, and safety standards.
- Trains and develops team members on operational procedures, safety requirements, and performance expectations, ensuring consistent understanding across the team.
- Maintains accurate shift records, verifies timecards, and completes administrative reporting using Microsoft Office Suite.
- Documents workflows and procedures to support consistent execution and serve as a reference for training and policy adherence.

Outbound Supervisor | United Parcel Service (UPS)

Atlanta/Doraville, GA 08/2024 – 02/2026

- Evaluated daily operational processes against established standards, identifying gaps in safety and compliance practices and working with management to address them before they escalated.
- Reviewed equipment, systems, and workflows ahead of the Doraville hub launch, flagging issues and verifying readiness before operations began.
- Coordinated with teams across departments to share information, align on scheduling, and resolve issues that crossed functional boundaries.
- Analyzed daily performance data to identify trends and inefficiencies, adjusting staffing and workflows to keep operations on track.
- Trained and mentored incoming supervisors, translating complex operational requirements into practical guidance they could apply on the floor.

Sales Associate | Burlington / Kohl's

Lawrenceville, GA Oct 2023 – Feb 2025

- Processed customer transactions accurately using point-of-sale systems, maintaining precision during high-volume periods.
- Delivered strong customer service, resolving inquiries and supporting daily store operations.

Checkout Team Associate | Walmart

Mohegan Lake, NY May 2022 – Aug 2023

- Processed customer transactions accurately using point-of-sale systems, maintaining speed and accuracy during peak periods.
- Assisted customers with self-checkout operations and provided prompt, friendly service.

Student Researcher | Mercy College / Westchester Community College

Remote May 2021 – Jun 2022

- Designed and implemented Python programs to analyze and interpret structured datasets on student performance, evaluating factors including demographics and learning environment.
- Researched cybersecurity tools and techniques; produced an in-depth analysis on malware types with a focus on keyloggers.
- Presented research findings to faculty, students, and invited guests at program culmination events.

PROJECTS

Database Systems Project — SQL Design & Querying — *Kennesaw State University*

- Designed a normalized relational database modeled on a healthcare-style system, defining schemas with primary and foreign keys to reflect real-world data relationships.
- Inserted and validated relational data to ensure integrity and accuracy across tables.
- Wrote analytical SQL queries using joins and aggregates to extract and interpret data.

AES Analysis & Decryption Workflow — *Kennesaw State University*

- Built a structured, milestone-based Python workflow to analyze AES-256 encryption, automate decryption, and verify data integrity.
- Documented each phase with validation steps, demonstrating methodical problem-solving and attention to data accuracy.

Vulnerability Assessment Report — *Kennesaw State University*

- Conducted a structured vulnerability assessment in a lab environment, performing host discovery, service enumeration, and risk-based prioritization using CVSS scoring.
- Produced an executive summary with remediation and hardening recommendations.

Threat Intelligence Report — MOVEit Supply Chain Attack — *Kennesaw State University*

- Researched and analyzed a real-world supply chain attack, mapping attacker tactics to the MITRE ATT&CK framework and evaluating third-party risk implications.
- Produced a structured threat intelligence report covering the attack lifecycle, exploited vulnerabilities, and organizational impact.

SKILLS AND CERTIFICATIONS

Programming: Python, SQL, Java, HTML, CSS

Productivity Tools: Microsoft Office Suite (Excel, Access, Word)

Cybersecurity Tools: Wireshark, SIEM

Operating Systems: Windows, Linux

Certifications: ISC2 Certified in Cybersecurity (CC) | TestOut PC Pro | TestOut Network Pro

Affiliations: WiCyS (Women in Cybersecurity) | Order of the Sword and Shield (Omicron Sigma Sigma)
