(914) 221-8507 | Lawrenceville, GA | tyfannam@gmail.com | linkedin.com/in/t-moulton | tmoulton-cyber.github.io

PROFESSIONAL SUMMARY

Recent Cybersecurity graduate with a strong academic foundation in network security, data analysis, SQL, and Python. Hands-on experience leading teams, tracking operational metrics, and documenting business processes in a fast-paced environment. Proven ability to communicate clearly across functions, enforce compliance standards, and deliver consistent results. Pursuing a Master of Science in Cybersecurity at Georgia Tech while actively seeking entry-level roles in cybersecurity, data analysis, or IT operations.

EDUCATION

Georgia Institute of Technology

Master of Science: Cybersecurity (In Progress) | Jan 2026 - May 2028

Kennesaw State University

Bachelor of Science: Cybersecurity | GPA: 3.62 | Cum Laude | Dec 2025

PepsiCo S.M.I.L.E Scholarship, Viceroy Decree Scholarship, Hope Scholarship

Westchester Community College

Associate in Applied Science: Cybersecurity | GPA: 3.6 | Graduated with Distinction | May 2023

Phi Theta Kappa, PepsiCo Scholar, Women in STEAM, Commit to Change Leadership Program

EXPERIENCE

Frontline Supervisor

Aug 2024 - Present

United Parcel Service (UPS) | Atlanta/Doraville, GA

- Selected as a core team member for the launch of the newly renovated Doraville hub, supporting setup, testing, and documentation of operational systems and workflows.
- Tracked and reported daily performance metrics for a team of up to 18, monitoring production, quality, safety, and attendance against established targets.
- Developed and documented operational process standards and personal development plans to support onboarding and consistent performance management.
- Collaborated cross-functionally to verify readiness of equipment, systems, and processes prior to facility opening.
- Enforced compliance with UPS, station, and OSHA protocols; maintained accurate records of operational activities and safety audits.
- Communicated performance data and operational updates to management, escalating issues requiring special attention.

Sales Associate

Oct 2023 - Feb 2025

Burlington / Kohl's | Lawrenceville, GA

- Processed customer transactions accurately using point-of-sale systems, maintaining precision during high-volume periods.
- Delivered strong customer service, resolving inquiries and supporting daily store operations.

Checkout Team Associate

May 2022 - Aug 2023

Walmart | Mohegan Lake, NY

- Processed customer transactions accurately using point-of-sale systems, maintaining speed and accuracy during peak periods.
- Assisted customers with self-checkout operations and provided prompt, friendly service.

Student Researcher

May 2021 - Jun 2022

Mercy College / Westchester Community College | Remote

- Designed and implemented Python programs to analyze and interpret structured datasets on student performance, evaluating factors including demographics and learning environment.
- Researched cybersecurity tools and techniques; produced an in-depth analysis on malware types with a focus on keyloggers.
- Presented research findings to faculty, students, and invited guests at program culmination events.

PROJECTS

Database Systems Project — SQL Design & Querying

Academic Project | Kennesaw State University

- Designed a normalized relational database modeled on a healthcare-style system, defining schemas with primary and foreign keys to reflect real-world data relationships.
- Inserted and validated relational data to ensure integrity and accuracy across tables.
- Wrote analytical SQL queries using joins and aggregates to extract and interpret data.

AES Analysis & Decryption Workflow

Academic Project | Kennesaw State University

- Built a structured, milestone-based Python workflow to analyze AES-256 encryption, automate decryption, and verify data integrity.
- Documented each phase with validation steps, demonstrating methodical problem-solving and attention to data accuracy.

Vulnerability Assessment Report

Academic Project | Kennesaw State University

- Conducted a structured vulnerability assessment in a lab environment, performing host discovery, service enumeration, and risk-based prioritization using CVSS scoring.
- Produced an executive summary with remediation and hardening recommendations.

Threat Intelligence Report — MOVEit Supply Chain Attack

Academic Project | Kennesaw State University

- Researched and analyzed a real-world supply chain attack, mapping attacker tactics to the MITRE ATT&CK framework and evaluating third-party risk implications.
- Produced a structured threat intelligence report covering the attack lifecycle, exploited vulnerabilities, and organizational impact.

SKILLS AND CERTIFICATIONS

Programming: Python, SQL, Java, HTML, CSS

Productivity Tools: Microsoft Office Suite (Excel, Access, Word)

Cybersecurity Tools: Wireshark, SIEM

Operating Systems: Windows, Linux

Certifications: ISC2 Certified in Cybersecurity (CC), TestOut PC Pro, TestOut Network Pro

Affiliations: WiCyS (Women in Cybersecurity), Order of the Sword and Shield (Omicron Sigma Sigma)
